

# Emergency Conditions Project

FGI's effort to make recommendations  
on the design for:

- Risk Assessment
- Resiliency
- Surge
- Small and/or Rural Facilities
- Modular
- New and Renovation
- Alternate Care Sites
- Adult and Residential Facilities

**FACILITY GUIDELINES INSTITUTE**

The keystone to planning, design, and construction

How do we present these new requirements?

- New standards in the 2022 Guidelines?
- A freestanding Emergency Conditions Guideline?
- As a supplement to the 2022 Guidelines?

## Major Recommendations from ECC for Hospitals:

- Incident Command Center
  - Identify anticipated hazards specific to geographic location
  - Single-bedded rooms for resident rooms
  - Converting non-clinical space to patient care space
  - Means to locate IV pumps and monitors outside of patient rooms
-
